EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Donald J. MacDonald on March 22, 2005.

Claim 1 has been amended to include language describing the authentication of documents in a database using indexed information including seed values which correspond to each of the documents stored in the database. Amended claim 1 is as follows:

Claim 1. An apparatus for providing access to a plurality of authenticated electronic documents over a network comprising:

- a server computer;

- a user interface connected to said server via a first network interface for providing user access to said server;

- a computer network connected to said server via a second network interface, said electronic documents being accessible through said computer network;

- a database connected to said server computer via a third network interface, said database storing indexed information for authenticating the content of each of said plurality of electronic

documents, the indexed information including seed values corresponding to each of said electronic documents;

said first network interface, said second network interface and said third network interface being disjunct respective to each other such that said user interface, said computer network and said database are not in communication therebetween;

a verification server comprising first and second network interfaces for connecting said computer network and said database thereto, said first and second network interfaces being disjunct such that said database is not accessible through said computer network, said verification server for iteratively traversing said database and retrieving said indexed information corresponding to a next one of said electronic documents, retrieving said electronic document via said computer network, checking the authenticity of the content of said electronic document using said corresponding seed values and updating the database with a status of the authenticity of said electronic document;

said server computer configured so that upon receipt of a user request for a document, said server queries said database as to whether said requested document is indexed therein and returns a denial if said requested document is not indexed in said database, otherwise said server retrieves said requested document via said computer network, confirms the authenticity thereof using said seed values corresponding to the requested document and returns the contents of the requested document to the user if the requested document is determined to be authentic;

wherein said apparatus provides a user access to a plurality of authenticated electronic documents available through said computer network and prevents the user from directly accessing said computer network.

Allowable Subject Matter

Claims 1-18 are allowed.

The following is an examiner's statement of reasons for allowance: In applicant's claimed invention, documents are authenticated due to the indexing of documents based on a seed value calculated from the content of each document, which is novel, unobvious and useful. Claim 15, and its depending claims 16-19 disclosed this aspect of applicant's invention. As mentioned in the Examiner-Initiated Interview Summary, this aspect of novelty, usefulness and unobviousness was communicated to applicant's lawyer and an amendment of independent claim 1 was recommended in order to make the claim and its dependent claims 2-14 allowable. Applicant complied and applicant's lawyer faxed examiner an amended copy of claim 1 that meets the statutory requirements for patentability.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
